IMPACT

15 AI Engineers created a predictive model embedded in a web app for real-time healthcare cost insights.

The Challenge:

iryss Innovation Challenge

CERTIFICATE OF ACHIEVEMENT

THIS IS PRESENTED TO

Quadri Bello

Lead ML Engineer

The team commendably overcame challenges to create a predictive tool for estimating out-of-pocket costs across all lung cancer stages. Through skillful data mining and analysis, they developed a user-centric web application with an embedded, highly accurate model, showcasing their technical expertise and commitment to improving healthcare financial planning.
